

Tossaporn (Tree) Saengja

Experienced in developing advanced deep learning models (GenAI, LLMs) and leading research over six years.

education

Massachusetts Institute of Technology

Master of Engineering in Computer Science and Engineering 4.8/5.0 2019-2020
Bachelor of Science in Computer Science and Engineering 4.8/5.0 2015-2019

International Olympiad in Informatics 2013 (IOI), Bronze, 85th among 299 contestants (77 countries)

ACM Boston Preliminary 2016 (BOSPRE), 4th place among 37 teams (16 schools)

IOI Thailand Coach (2023-Present), Teaching Assistant for MIT 6.824: Distributed Systems (Prof. Robert Morris, Spring 2020)

experience

SiData+, Siriraj Hospital — Data Scientist 2024-Present

- Medical reasoning Large Language Model (LLM) research with SCB 10x, focusing on improving general medical applications.

a2z Radiology — Software Engineer 2025-Present

- Developed DICOM viewer for demo UI showing radiologist workflow with model predictions.

- Maintain model lifecycle according to FDA requirements.

PreceptorAI, CARIVA — AI Consultant 2023-2025

- Developed machine learning models in collaboration with Siriraj Radiology Department:

- Multi-label segmentation model (nnUNet, 0.98 Dice) for vertebrae L3 (muscle, fats) quantification in MRI.

- Vision-Large Language Model to generate diagnostic reports from chest X-ray images (PyTorch).

- Generative text-to-image model (diffusion model) for synthetic chest X-ray generation (PyTorch, MONAI).

- Led research and development of Gindee, a VLM based nutrition estimator.

Vision and Learning Lab, VISTEC — Research Assistant, under Prof. Supasorn Suwajanakorn 2023-2024

- Investigated object collocation by developing Score Distillation Sampling (SDS) to leverage Stable Diffusion's priors.

- Enhanced local attention masking in CLIP for zero-guidance segmentation.

- Conducted experiments on diffusion model memorization (CIFAR-10).

Mahidol Wittayanusorn High School (national top-tier science school) — Computer Science Teacher 2020-2023

- Coached students to represent Thailand in IOI 2022.

- Lectured data science (Python), web dev, blockchain, Computer Olympiad (C++), programming (Python).

- Advised year-long student projects, primarily in machine learning.

Agnos — Technical Cofounder 2019-2023

- Co-developed an AI-powered diagnosis system (Python, Django) used by physicians. (130k+ records, 50k+ active users)

- Led Data Science, AI, and Growth teams, helped securing 30M THB funding (Shark Tank Thailand S3).

Facebook, Notification Backend — Intern 2017

- Implemented a pipeline for network effect prediction (classification/regression) using HiveQL and FB Learner Flow.

- Increased comment metrics by 0.5% in production (2B active users).

publications

On the Robustness of Answer Formats in Medical Reasoning Models (co-corresponding, under review)

P. Taveekitworachai*, N. Pongjirapat*, K. Chaisutyakorn, P. Ittichaiwong, **T. Saengja****, K. Pipatanakul**. [arXiv:2509.20866](#)

LUSSD: Localized Update Score Distillation for Text-Guided Image Editing (co-first, ICCV 2025)

W. Chinchuthakun*, **T. Saengja***, N. Tritrong, P. Rewatbowornwong, P. Khungurn, S. Suwajanakorn. [arXiv:2503.11054](#)

ZeroGuideSeg++: Improving Local Attention Masking in CLIP for Zero-Guidance Segmentation

P. Rewatbowornwong, N. Chatthee, **T. Saengja**, E. Chuangsuwanich, S. Suwajanakorn. (under review)

Decomposing Food Images for Better Nutrition Analysis

P. Khlaisamniang, et al. (**T. Saengja** as corresponding author). [CVPR MetaFood 2025](#)

GPU Poor's Guide to Radiology Report Generation

K. Udomlaksakul, et al. (**T. Saengja** as third author). [Proc. BioNLP 2024](#).

reviewers

ICLR 2026, CVPR 2026

selected projects

Accurate Clinical Decision Support Systems (MIT 6.S897: ML for Healthcare, 2017)

Analyzed drivers of clinical decision support dismissals using logistic regression, random forests, LDA.

Paraphrase Identification (MIT 6.867: Machine Learning, 2016)

Designed BoW, word-embedding, SVM, NN, and LSTM models achieving 81.8% F1-score on MSR Paraphrase Corpus.
